

Environmental Consulting Services Market Size, Drivers, Restraints, Segments, Market Players

Environmental Consulting Services Market from The Business Research Company, offers a sales Strategy, growth analysis, size, segmentation, forecast and more.

LONDON, GREATER LONDON, UK, April 16, 2019 /EINPresswire.com/ -- The global environmental consulting services market grew from around \$29 billion in 2013 to more than \$31 billion

in 2017 at an annual rate of almost 3%. It is expected to grow from more than \$31 billion in 2017 to nearly \$36 billion in 2021 at an annual rate of more than 3%. Growth will result from a growing focus on sustainable development, development of smart cities, global collaborations for environmental protection and increasing environmental regulations. Growth will be only equal to global GDP growth, however, demand from China will grow at well below the country's GDP growth rate owing to slow growth in manufacturing activity in the country and in the USA carbon emissions and climate change regulations are being softened.

A shortage of skilled environmental specialists and lack of awareness and action on environmental issues have negative impacts on the [environmental consulting services market](#).

By type of service, site remediation consulting services was the largest segment in the environmental consulting services market in 2017, which accounted for about 34% of the market. This was mainly due to the presence of a large number of manufacturing, construction and oil and gas industries that require the services of site remediation consulting companies.

The global environmental consulting services market is a fragmented market with a few large players. AECOM was the largest competitor with almost 10% share of the market, followed by Amec Foster Wheeler PLC, Tetra Tech, Environmental Resources Management Limited and Arcadis.

The environmental consulting services industry comprises establishments that provide advice, assistance, and action plans to organizations and governments to manage their environment. It includes services on environmental issues such as environmental contamination prevention, emission of toxic substances prevention, waste management and pollution control.
