

Recoverit Data Recovery Now Provides Advanced Pen Drive Data Recovery Solution

SHENZHEN, GUANGDONG, CHINA, April 19, 2019 /EINPresswire.com/ -- Recently, Recoverit Data Recovery software by Wondershare has come up with a new and advanced version. The tool has extended its support for USB drive data recovery. Although it had the feature in the previous versions as well, the new release promises an even better experience for its users. Now, anyone can [recover all kinds of files from USB](#) drives. This includes pictures, videos, music, documents, compressed files and so many other types of content. The application provides comprehensive support to recover more than 1,000 different file formats now.

Apart from improving its data scanning and extraction algorithm, the application has also come up with an intuitive interface. Now, using Recoverit Data Recovery is extremely easy as it features a user-friendly interface that follows a basic click-through process. Therefore, anyone can learn [how to recover corrupted files from USB](#) drives without any prior technical experience.

The data recovery application also supports all the leading USB drive manufacturers. This includes flash drives from companies like SanDisk, Kingston, Sony, HP, Patriot, Samsung and every other major brand. The [pen drive data recovery](#) process supports different scanning methods and will let users have a preview of their data before restoring it.

Here are some of the major features of the data recovery tool:

- Recoverit Data Recovery is known for one of the highest data recovery rates in the industry (96 percent)
- It can recover more than 1,000 different types of data formats, including photos, videos, audios, emails, documents, etc.
- All kinds of data-loss scenarios are supported by the application. For instance, some common scenarios that it can resolve are virus attack deletion, accidental data deletion, USB drive formatted, USB drive storage corrupt and more.
- It features different scanning modes (normal and deep) that would meet every user requirement related to pen drive data recovery.
- A free version of Recoverit Data Recovery is provided for both Windows and Mac. Later, users can upgrade to its premium version as well.

Already, millions of people use Recoverit to recover files from USB drives. Adam, who is one of the users, says, "I lost my important documents from my USB drive and didn't know what to do. Thankfully, I gave Recoverit Data Recovery a try and got back all my lost content without any damage. The tool is extremely easy to use and I would recommend it to all."

Compatibility

The desktop application is available for every leading Windows and Mac version. It supports Windows Vista, XP, 7, 8 and 10. Also, users can install it on macOS 10.6 and every later version (including macOS X 10.14).
