

Material Science And Nanotech Advances Driving Smart Fabrics As The Major Trend In The Global Apparel Market

The Business Research Company offers Apparel Market By Type Of Product, Trends And Market Size – Global Forecast To 2022 to its research store.

LONDON, GREATER LONDON, UNITED KINGDOM, May 6, 2019 /EINPresswire.com/ -- Technological advances in material sciences and nano technology are stimulating the demand for smart fabrics. Smart fabrics have digital components such as sensors embedded in the fabric. They have the ability to interact with the individual and their environment, by tracking and communicating data about the individual and environment to other devices through sensors and conductive yarns. They are widely used in fashion, entertainment, medical, transportation, sports and fitness and military. For instance, Ralph Lauren in 2014 launched technology enabled tennis shirts that monitored heart rate, breathing and stress levels among players.

Apparel manufacturing establishments are engaged in the manufacturing of hosiery, socks, knitting of fabric, cutting and sewing of apparel and accessories and their sale.

The [apparel manufacturing industry](#) can be categorized as follows:

- Hosiery and Sock Mills comprises establishments that engage in knitting or knitting and finishing hosiery and socks.
- Cut and Sew Apparel Contractors engage in cutting and sewing materials owned by others for apparels and accessories.
- Other Apparel Knitting Mills include establishments that knit, manufacture and finish knit underwear, outerwear and nightwear.
