

Sagenext Announces Post Tax Season Offers on their QuickBooks Hosting Services

To celebrate the successful completion of yet another busy filing season, the company has announced exclusive deals on all of their service plans.

US, May 8, 2019 /EINPresswire.com/ -- [Sagenext Infotech](#), an Augusta-based IT hosting provider, has announced exclusive offers and pricing deals on both its shared and dedicated hosting plans to mark successful completion of tax season 2018. With this scheme, new subscribers can avail a special 15% off on QuickBooks hosting, Sage hosting or tax software hosting services. The company, with this "Post Tax Season Offer", has also rolled out some new schemes and policies for the existing clients to appreciate them for making the tax season, a successful one.

The 2018 tax season had its own set of challenges and complexities. Besides tax technology advancements, cybersecurity requirements, due diligence issues, and workload management, sweeping changes made under the law or more commonly referred to as the TCJA (Tax Cuts and Jobs Act) were the biggest areas of concerns for both tax preparers and payers. Fortunately, though, Sagenext had made some functional and technical upgrades on their cloud infrastructure to assist the users. These upgrades simplified and accelerated tax operations by rendering high performance, speed, agility, and flexibility of the cloud to the users during the hectic season.

During a company event, Mr. Ned Adams, Chief Officer – Technical Sales at Sagenext said, "Finally, the season has come to a close and we would like to thank our valued customers for putting their trust in us. Working as technology partners and enablers for them, we always strive to serve the best of facilities and we are more than delighted for making the season easy and productive for our clients". He further continued, "On-demand application accessibility backed by stringent data security measures are the key differentiator in making cloud-based services a sure-shot hit among modern business practices. No wonder, a lot of professionals from the tax and accounting industry are turning to us to get advanced yet cost-efficient cloud-ready platforms to enjoy the facility of working anytime from anywhere with maximum efficiency and accuracy".

The company's singular aim is to deliver world-class cloud experience to the users at the best prices, and with this new offer, the company is expecting to welcome more users on their platform.
