PUNE, MAHARASHTRA, INDIA, May 9, 2019 /EINPresswire.com/ -- [Sleep Apnea](#):

Executive Summary

Sleep Apnea is a life-threatening sleep disorder characterized by abnormal pauses in breathing. It is caused by either complete obstruction of the airway (obstructive apnea) or partial obstruction (obstructive hypopnea). There are three types of sleep apnea — obstructive, central, and mixed. Obstructive sleep apnea (OSA) is the most common type of sleep apnea. This condition is found to be more prevalent in elderly population and is often stimulated by lifestyle related chronic diseases such as cardiovascular diseases and obesity.

Growth of global sleep apnea devices market is primarily attributed to prevalence of sleep apnea, high incidence of lifestyle-related chronic diseases, increasing obesity, rising demand in emerging markets and increasing geriatric population. However, some of the factors restraining growth of the industry are stringent regulatory norms and high cost of devices.
