

CompIntelligence Announces San Francisco Training Center and Additional OneStream Course Offerings

CompIntelligence is pleased to announce the opening of their third authorized OneStream Software training location in San Francisco, California.

OXFORD, CONNECTICUT, UNITED STATES, May 9, 2019 /

EINPresswire.com/ -- CompIntelligence, a Authorized OneStream Training Partner, is pleased to announce the opening of their third authorized

OneStream Software training location with the addition of San Francisco, California. Expanding on the existing facilities in Connecticut and Georgia, this new location supports OneStream's aggressive growth in the CPM marketplace, while providing more options for customers to deploy training across their organizations. Beginning in June 2019, the San Francisco location will offer OneStream customers the Application Build for Administrators class.

New course offerings include OneStream Advanced Report Writing and OneStream Project Team Training. Advanced Report Writing was created to train users to take the feature-rich capability of the OneStream Report Writing engine to the next level. Project Team was created for users who are less technology-oriented, but need to know the terminology and concepts to more effectively participate in the design and long-term use of their OneStream application.

As an original and long-standing OneStream partner, CompIntelligence maintains an experienced, top-notch Professional Services team ready to provide Administration training, as well as custom, application-specific training, ensuring faster and smoother end-user adoption.

"Coast to Coast training locations and the addition of advanced courses illustrates how CompIntelligence has continued to innovate and grow with us since our inception. We appreciate their continued investment in OneStream and their contribution to the success of our customers."

– Craig Colby, Chief Revenue Officer, OneStream Software

This milestone continues the expansion of CompIntelligence service capabilities to the west coast and across the nation.

"The addition of the San Francisco training location shows our continued growth throughout the country and builds on our OneStream Professional Service offerings available nationwide and around the globe. As the OneStream community grows and users become more capable and advanced, we are thrilled to be ahead of the curve in offering training for all skill levels as evidenced by our newest offerings, OneStream Custom Power User and End User Training."

– Marie Daniels, Managing Partner, CompIntelligence

Further details about our class schedules, locations or registration information can be found at
