

Econoday Delivers Live and Historical Economic Data to AI and Algorithmic Trading Firms

Econoday, provider of historical data for today's leading firms.

LAFAYETTE, CA, UNITED STATES, May 10, 2019 /EINPresswire.com/ --

Econoday, the leader in delivering global economic data to the investment industry for more than 25

years, provides a comprehensive, machine-readable feed of market-sensitive economic event data. The unique dataset consists of Econoday's proprietary consensus expectations numbers, the actual reported numbers, and revised figures. Algorithmic trading firms and AI technology firms are leveraging Econoday's unique historical dataset to fuel their proprietary trading models and support their research teams and compliance departments.

Unique Historical Economic Data

Econoday is the only firm offering unbroken access to an archive of global economic event data, as the figures were initially reported. The dataset, which dates to 2001 for U.S. figures, also features Econoday's proprietary consensus expectations figures, plus the initial revision. The actual, as-released data, plus the Econoday consensus, allow for a transparent look-back at market volatility on specific release dates. The norm for data providers has been to overwrite data in their systems when revisions are announced, which means the originally reported figures are lost. Econoday alone delivers the original numbers, with accurate timestamps for data releases, and other economic events, such as central bank rate announcements and speeches.

Historical Data Availability

- Consensus forecast expectations: Econoday is one of a handful of companies to provide an actively-managed proprietary consensus. The Econoday consensus represents the median among forecasts submitted weekly by our survey panel of 20 selected top economists. We provide a consensus forecast for data that matters to financial markets. If a value is not important enough to forecast, then we won't have a consensus. The estimate provided by most other firms generally reflects the singular viewpoint of one economist.

- Actual data as initially reported, and initial revision: U.S. indicators date to 2001. Key non-U.S. indicators date to 2003. We can provide a spreadsheet with the specific listing.

About Econoday, Inc.

Econoday is a data technology and information company that has been serving the financial industry for more than 25 years. Econoday is one of the leading providers of global economic data, with a vast archive of data and analysis used in creating innovative product solutions for the financial industry.
