

Indonesia's Ministry of Transportation Adopts neo as its English Learning Solution

JAKARTA, INDONESIA, May 10, 2019 /EINPresswire.com/ -- The Bureau of Personnel & Organization of the Indonesian Ministry of Transportation has selected DynEd's neo Professional solution for its English language-learning needs. Fifty-one members of the Ministry, located in different locations and offices, took neo's placement test this past 23rd of April in DynEd's Jakarta office. As a result of

this assessment, thirty members who scored in the intermediate skill levels (A2 to B2) will be working towards the completion of one English skill level certification during the next seven months using neo Professional's comprehensive self-study + online coaching solution.

neo Professional Assessment & Orientation for Ministry of Transportation staff members.

With neo Professional, the Ministry's personnel will learn at their own pace, using the AI-driven neo Study App on their mobile devices. Then they will meet with experienced neo Live coaches online every two weeks to expand their oral skills and gain additional confidence in their speaking abilities. "We selected neo Professional because it provides measurable results and allows us to include a larger number of participants who can learn at their own pace using their mobile devices from various working locations," says Hary Kriswanto, Head of Bureau of Personnel & Organization.

After five to seven months those members who complete the certification requirements will be awarded an internationally-accepted English level certificate that is aligned to the Common European Framework of Reference for languages, or CEFR.

"DynEd's international certification program does not rely on a single test to issue certification. It uses a series of Mastery Tests to ensure comprehension throughout the course of study. An Exit test is then required to complete each CEFR-aligned level," says Ian Adam, DynEd's President and Chief Executive Officer.

About DynEd

DynEd International, Inc. was founded in 1987 by a team dedicated to improving the quality of language education. The company's blended approach combines the best of teachers and technology, and is built around a brain-based learning theory that is a breakthrough in English language learning. Now, after more than 30 years of results, DynEd has partnered with Nexgen English Online Co to create neo Professional—a flexible AI-based learning solution that utilizes DynEd's syllabus, course content, and industry-leading algorithms adapted for mobile devices.
