PUNE, MAHARASHTRA, INDIA, May 13, 2019 /EINPresswire.com/ -- [Connected Car M2M](#) Market 2019

## Description:

A connected car is a car that is equipped with Internet access, and usually also with a wireless local area network. This allows the car to share internet access with other devices both inside as well as outside the vehicle.

One of the primary drivers for this market is the growing number of smartphone integrated services. The demand for in-vehicle connectivity and telematics has led to technological advances that aim to enhance the overall in-vehicle experience of both the passengers and drivers.

Moreover, owing to the growing demand for electronic vehicles across the world, automotive OEMs are developing applications that will allow the consumers to connect their smartphones to the vehicle to provide a real-time status of their vehicle's battery.

In 2018, the global Connected Car M2M market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025.
