

ICYMI...Exciting New Developments At AMAG Technology, A G4S Company

Plus, Thought Leadership With AMAG & G4S Senior Executives "In The Boardroom" on SecuritySolutionsWatch.com

NEW YORK, NEW YORK, UNITED STATES, May 17, 2019

/EINPresswire.com/ -- AMAG

Technology announced the release of Symmetry CompleteView 20/20, a video management software solution designed to operate as a stand-alone system or integrate with the Symmetry platform that includes intrusion management, access control, identity management, visitor management, incident and case management, command and control software and mobile technology to deliver a complete end-to-end security solution.

“

We are honored to have Rachelle Loyear, Kurt Takahashi and other senior executives at AMAG & G4S join us "In The Boardroom" to discuss the Company's transformation and security thought leadership"

Martin Eli,

"Symmetry CompleteView 20/20 provides users with a robust video management software solution that is simple, scalable and secure," said Jim Murray, senior product manager-video, AMAG Technology. "The dynamic feature set combined with Symmetry Access Control and Control Room, deliver an integrated solution unmatched anywhere in the industry."

AMAG Technology, a world-leader in unified solutions that help organizations mitigate risk, meet compliance and save money, announced the Symmetry™ M4000 Intelligent Door Controller. The new controller is the next generation Symmetry panel to the Symmetry M2150 Controller. The powerful, flexible and open M4000 protects all types of buildings while maintaining a low cost of ownership.

The Symmetry M4000 provides distributed intelligence for Symmetry Security Management Systems which can be used for simple applications to enterprise-wide deployments. The controller supports four doors, up to one million credentials and 65,000 off-line transactions, which can be expanded further if required. Install multiple controllers to a single network connection with up to 20 readers, 80 inputs and 64 outputs. The controllers will operate with Symmetry Access Control software V9.1 and above.

The Symmetry M4000 supports OSDP, Wiegand and AMAG's own MCLP reader communications, enabling organizations to install industry standard Symmetry access control software and modules and providing end users with the option to choose any card reader that fits their unique needs and requirements. It comes with an onboard 1Gb network interface with AES encryption capability.

Symmetry Sentry, a remote management tool, is available to allow web-based configuration, monitoring and upgrading of the Symmetry M4000. This saves time and money by allowing the integrator to manage the controller from their office or an independent location.

"The Symmetry M4000 Intelligent Door Controller is designed to secure buildings of any size. The controller's open-source operating system and API will allow any company to integrate it," said AMAG Technology, Product Manager, Andy Goodwin. "The M4000 demonstrates AMAG's commitment

Kurt Takahashi, President AMAG Technology, A G4S Company

Rachelle Loyear, Vice President, G4S

to providing open and standards-based solutions to our customers.”

AMAG Technology and Suprema Deliver Integrated Access Control with Biometric Solution

AMAG also recently announced the integration of its Symmetry Access Control v9.1 software with Suprema’s BioLite N2 and BioEntry P2 Biometric readers. The integration allows Symmetry users to gain biometric access to a door using their fingerprint and a credential. Suprema is a long-time member of AMAG’s Symmetry Preferred Partner Program. Both AMAG and Suprema have tested and certified the integration.

“The Symmetry Access Control integration with Suprema’s biometric readers provides a powerful, yet flexible security option for our customers who demand multi-factor authentication security for highly secure areas such as data centers,” said AMAG Technology, Vice President of Products and Partner Programs, Jason Schimpf. “We are pleased to continue our long and successful relationship with Suprema and are excited to provide our customers with a reliable biometric option for their security needs.”

“Our partnership with AMAG and integration with Symmetry provides customers with a dependable and fast biometric reader that can operate in any environment,” said Suprema, Managing Director, Hanchul Kim. “Our fast fingerprint matching provides a quick response for users, and customers will benefit from the two or three factor authentication available to them.”
