CIS Announces Strategic Partnership with Credits & Trustpilot.com

To support a synchronised strategic growth, CIS partners with Credit & Trustpilot.com.
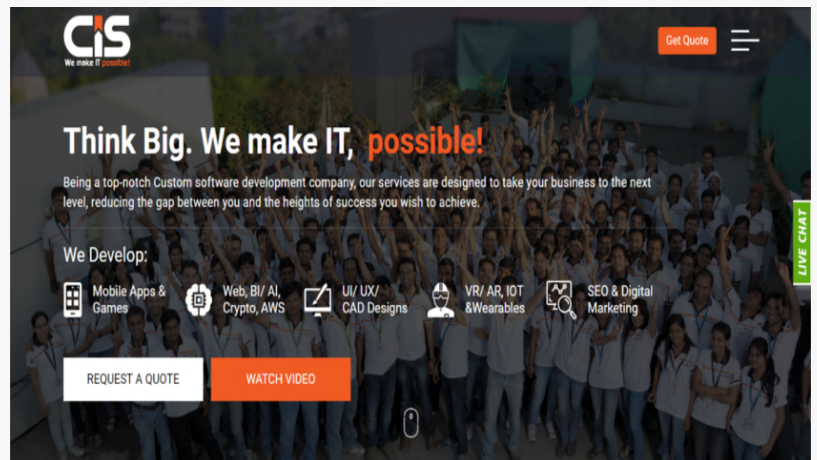

SAN JOSE, CALIFORNIA, USA, May 17, 2019 /EINPresswire.com/ -- As the news comes from the top authorities at CIS. CIS, Cyber Infrastructure, which is a CMMI Level 3 certified digital solutions provider has partnered with three reputed brands in the industry, namely – Trustpilot and Credits. This great move from the company surely hints a step towards collaborative growth. CIS has already grown as a reputed name in the field of IT solutions and [website development services](#), and has its presence across the globe with physical offices in the USA, UK, India, Singapore and South Africa. The custom software development company has been 16+ years in the business and has served thousands of clients over the course.

Credits

Credits is a pronounced autonomous blockchain and smart contracts-based platform. The platform is designed to develop a wide plethora of decentralised applications.

As we talk about some of the key features of the Credits platform that define its popularity, these are:

1) Enables storage of information in an encrypted form, issuing of financial assets, and IoT implementation with blockchain.

2) Support cryptocurrency application development.

3) Successfully serves industries like

CIS Announces Strategic Partnership with Credits & Trustpilot.com

logistics, banking, insurance, logistics, lending, industrial goods, etc.

4) Provides autonomous or automatically executing smart contracts.

Cyber Infrastructure has partnered with Credits to offer more pronounced cryptocurrency and blockchain applications. This move will help CIS to serve its clients with some of the most advanced and custom developed decentralised applications.

Trustpilot

Trustpilot is a popular business review platform that allows the users to post reviews on various businesses and their services. So, the other users and businesses can check the reviews given to a specific business by its clients or customers.

Some of the key features of Trustpilot for businesses are as follows:

1) Businesses can get their customers/clients easily review their services.

2) This will help businesses get ratings from their customers and rank higher on Google.

3) Agencies can use the platform to draw reviews for their partner agencies as well.

4) Reviews from Trustpilot can help businesses gain better trust and help them lead in terms of traffic.

As CIS partners with Trustpilot it will be easy for its clients to give its feedback on the services it delivers along with the ratings. It will also boost the company's rankings and trust factor.

The news has surely come up as a great announcement, and would be impacting the company and its client base in a positive way. A top authority at CIS says, "CIS has always opted for strategic growth which could benefit us a business, our clients, and the industry. Being a leading-edge software service and outsourcing company, we are always up for innovations to be at the top of the technology graph and help our clients leverage the benefit. We have recently partnered with Credits, which is one of the most trusted platforms for bringing blockchain development services in practical applications.

And this will surely help us in delivering the best solutions to our clients over cryptocurrency and decentralised applications. This will help us in meeting prompt web development requirements for clients with specific requirements. CIS has also partnered with Trustpilot so to focus on our trust factor as a company and making it easy for our customers and clients to rate our business and give feedbacks about our services. This will also help businesses and our future prospects get a better idea of the expertise we boast and the experience of our previous clients with our services." He continued, "These partnerships have been into planning for a long time now and were finally executed to grow as an organisation and raise our capability as a service provider so we can offer the best solutions to our global client base."
