Description:

IAM is a security solution that ensures the accessibility of resources to authorized individuals in a multi-technology environment. IAM solutions provide secure identity-based access to on-premises and cloud-based systems, applications, and information from any location. These solutions help enterprises secure application systems by permitting employee access with a single sign-on (SSO) password.
Emergence of cloud-based identity and access management solutions has contributed largely to the growth of the market. Stringent policies by government cyber authorities to protect data are another major factor driving the growth of identity and access management solution market. The demand is further enhanced due to growing cyber-attacks on organizations to gain access to confidential data.
