

Chronic Pelvic Pain in Polypropylene Sling Complications

Free eBooks are available to women suffering from serious health problems associated with the use of synthetic mesh slings.

SANTA BARBARA, CA, UNITED STATES, May 17, 2019 /EINPresswire.com/ -- Women suffering from serious health problems associated with the use of synthetic mesh slings need expert medical evaluation and treatment. In a recently published video series, Michael Hibner, M.D., Ph.D., who is Board Certified in Urogynecology and a Chronic Pelvic Pain Specialist, discusses neuromuscular complications of polypropylene transobturator and retropubic slings used for the surgical management of stress urinary incontinence (SUI). This programming is available on the [Pudendal Educational Portal](#).

Dr. Hibner provides crucial insights into the comprehensive treatment plan provided at a specialized women's pelvic pain clinic. Dr. Hibner outlines a proper case evaluation, removal surgery, reconstructive surgery and ongoing therapies to improve the patient's quality of life with better function and pain relief.

Dr. Greg Vigna, MD, JD, is Board Certified in Physical Medicine and Rehabilitation, a Certified Life Care Planner, and National Pharmaceutical Injury Attorney. He has produced [free eBooks](#) focused on Chronic Pelvic Pain with Dr. Hibner to educate women with mesh related complications as to what highly specialized diagnostic and treatment options have been providing the most favorable results. Dr. Vigna continues to contribute his expertise on neuromuscular complications of the TVM devices, bringing these critical issues to the forefront of women's health.

“

We are filing new injury cases involving transobturator and retropubic slings in State Court. We are investigating cases with severe pain and disability...”

Dr. Greg Vigna

Dr. Vigna and his team of seasoned trial lawyers pursue mesh cases involving women diagnosed with chronic nerve pain such as pudendal neuralgia, [complex regional pain syndrome](#), or obturator neuralgia. These cases are inside and outside the TVM West Virginia Multidistrict Litigation (MDL). Dr. Vigna is the first attorney to have pudendal neuralgia clients filed in State Courts in Arizona and California after the MDL closed its doors to new cases.

Sling Consequences – Read Our Latest E-Book

Dr. Vigna states, “We are filing new injury cases involving transobturator and retropubic slings in State Court. We have cases with symptoms that develop immediately after implantation and

cases that become symptomatic eight years after implantation. The diagnosis of pudendal neuralgia and obturator neuralgia is not a prerequisite to my representation. We are investigating cases with severe pain and disability and will look to file these cases in State Courts across the country.”
