PUNE, MAHARASTRA, INDIA, May 20, 2019 /EINPresswire.com/ -- [Cloud-based Video Conferencing Market](#)

Cloud-based video conferencing or video conferencing-as-a-service (VCaaS) allows two or more locations to communicate by simultaneous two-sided audio and video transmissions. In cloud solutions, cloud server is used to transfer, access, and storage data. Video conferencing is different from videophone calls as the former is designed to process multiple locations rather than individuals. VCaaS provides organizations the benefits of high-quality HD video conferencing technology without any major investment in hardware, infrastructure, and network. Cloud-based video conferencing makes video transmissions easily accessible to anyone at any point of time from anywhere.

With the rising globalization of business organizations worldwide, need for flexible, scalable and cost effective communication techniques has grown substantially since the past few years. Video conferencing is a viable solution for organizations to organize online conference thereby eliminating the costs related to traveling and accommodation. Likewise, video conferencing acts as a boon for business entities having multiple geographical locations requiring frequent collaboration. Video conferencing solutions are available both; on-premise as well as cloud-based.
