## Description:

Information technology refers to all the technology used to handle telecommunications, broadcast media, intelligent building management systems, audiovisual processing and transmission systems, and network-based control and monitoring functions. The information revolution and the extraordinary increase in the spread of knowledge has given birth to a new era-one of knowledge and information which affects directly economic, social, cultural and political activities of all regions of the world.

Information Technology (IT) is widely acknowledged to be crucial for efficient operation and management of all industrial systems. The demand for IT services has increased substantially over the years. Oil and gas companies are under pressure to achieve higher returns on their capital assets in a safe and sustainable manner. They need to drive higher asset reliability, productivity and performance while managing growing demands as well as competition for oil reserve access.
