IoNT is a network of nanoscale devices, sensors, and machines integrated into everyday physical objects that are connected to the Internet for effective data communication. It improves operational efficiency by increasing the pace of communication over the existing infrastructure and enhances business productivity in any industrial setup. IoNT focuses on improving the process capabilities by expanding the data storage and computing capacity at the basic sensor level.

United States has the Dominant Market in North America Owing to High Adoption Rates in Various Industries. The emergence of nanotechnology in this region has resulted in the technology being widely used in a number of industries. One industry, which has adopted this nanotechnology, is the healthcare industry. Various harmful diseases are proving to be a tremendous challenge for modern medicine. This, coupled with growing consumer health awareness in the region, means for a more advanced technology. Nano medicine was introduced in this industry to overcome this hurdle since it offers a number of potential ways to improve medical diagnosis & therapy, even in regenerating tissues and organs. In addition, IoT platform acts as a medium to communicate with nanotechnology. Similarly, defense & aerospace is another major industry making use of nanotechnology. Nanotechnology is used in drones for drone surveillance and other such factors.
