PUNE, INDIA, May 24, 2019 /EINPresswire.com/ -- The drug obtained from marine organisms which are being conventionally used like shark and cod-liver oils, sodium alginate, agar-agar, chitin etc.

Marine organisms are potential source for drug discovery. Life has originated from the oceans that cover over 70% of the surface of earth and contain highly ecological, chemical and biological diversity starting from micro-organisms to vertebrates. This diversity has been the source of unique chemical compounds, which hold tremendous pharmaceutical potential.

North America is the largest consumption market of Marine Pharmaceuticals, with sales market share nearly 33.4% in 2018. The second place is Europe; following North America with the sales market share over 23.3%, China and Japan are also an important sales area. In 2018, The global marine pharmaceuticals market will observe steady growth because of the robust growth in APAC during the forecast period. But, the market shares of the Americas and EMEA will decline to some extent during the forecast period. APAC will be a leader in market growth during the forecast period owing to the increasing awareness and improved access to healthcare.
