

XTI Aircraft Company and Heliflite Announce Milestone Agreement

Exclusive arrangement for engineering support, maintenance and sales of TriFan 600

DENVER, CO, USA, May 28, 2019 /EINPresswire.com/ -- [XTI Aircraft Company](#) (XTI) announced today it has entered into a sales and services agreement with [Heliflite](#), one of the leading aircraft distributors in Australasia.

"This is a major development for XTI," said XTI Chief Executive Officer Robert LaBelle. "We're pleased to be working with Heliflite on an exclusive basis in this part of the world. They've been providing sales, service and spare parts support to the helicopter industry and other aircraft owners since 1977, and have earned an excellent reputation."

TriFan 600 is Coming to Australia!

“

We're pleased to be working with Heliflite on an exclusive basis in this part of the world."

XTI CEO Robert LaBelle

The company stated that the agreement with Heliflite includes engineering and maintenance services for the [TriFan 600](#), as well as an important role in XTI's pre-sales and sales program. The exclusive arrangement covers Australia, New Zealand, and the rest of Oceania, as well as Indonesia, and The Philippines.

"Heliflite is looking to the future, anticipating the next big thing in air travel, which has led us to proudly establish this

relationship with XTI's highly experienced design and management team. Heliflite looks very much forward to being instrumental in the TriFan 600's success in our region," said Heliflite Director Scott Edmonds.

XTI recently announced it had successfully completed initial hover tests of the TriFan 600 prototype, which tested the vehicle's autonomous functions and ground control systems, including the electric motors, the battery system, ducts, propellers, flight controls, electrical systems and instrumentation. Future flights will test forward, wing-borne flight, as well as the transition phase between vertical and forward-flight modes.

The company also previously reported it has booked early reservations for 78 aircraft, from customers on six continents, representing almost one-half billion dollars in future gross revenues, and also announced approval of its design and utility patents, recruitment of top industry executives, and strong supplier relationships.

The TriFan is a major breakthrough in aviation and air travel. The six-seat TriFan 600 will have the speed, range and comfort of a luxury business aircraft and the ability to take off and land

vertically, like a helicopter. It will travel at 345 miles an hour, with a range of up to 1,400 miles. Using three ducted fans, the TriFan lifts off vertically. Its two wing fans then rotate forward for a seamless transition to cruise speed and its initial climb. It will reach 29,000 feet in just ten minutes and cruise to the destination as a highly efficient business aircraft.

XTI launched a formal stock offering in 2016 under SEC Regulation A. The latest round of its offerings under Regulation A is open to all unaccredited and accredited investors around the globe. Shares in XTI may be purchased at <https://www.startengine.com/xti-aircraft>, providing a unique opportunity for the general public to invest in an aerospace company with a game-changing product, a world-class leadership team, and significant growth potential.

Simultaneously with the equity crowdfunding financing, accredited investors may participate in XTI's \$25 million Series B round. Accredited investors seeking more information should contact Mr. LaBelle at rlabelle@xtiaircraft.com (571) 216-1594.
