Network as a Service Market – 2019

Wiseguyreports.Com Adds "Network as a Service -Market Demand, Growth, Opportunities And Analysis Of Top Key Player Free Sample Report Forecast To 2025" To Its Research Database.

Report Description:

Network as a service (NaaS) describes services for network transport connectivity. NaaS involves the optimization of resource allocations by considering network and computing resources as a unified whole. Virtualization technology provides the platform for NaaS, which is related to other cloud services. Services are offered by Cloud Service Providers (CSP) in addition to NaaS include Software as a Service (SaaS), a computing platform for developing or hosting applications, known as Platform as a Service (PaaS); or an entire networking or computing infrastructure, known as Infrastructure as a Service (IaaS). Cloud services such as NaaS and PaaS are provided by building a large, scalable infrastructure that can be virtualized so that it can be sold to individual customers.

Since the entire networking infrastructure risk is transferred from enterprises to network as a service (NaaS) vendors, the need for dedicated IT teams is eliminated. The global network as a service market analysis identifies that the growing acceptance of OPEX model will be one of the major factors that will have a positive impact on the growth of the market.

In 2018, the global Network as a Service market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025.
