

# Cybersecurity in Focus at 3rd Annual Secureworld Chicago

*Nationally recognized cybersecurity conference returning to Chicago; hundreds of InfoSec leaders to learn and share best practices*

ROSEMONT, ILLINOIS, UNITED STATES, May 29, 2019 /EINPresswire.com/ -- These days, cyber incidents are making the headlines—from major data breaches and nation-state hacking to ransomware viruses that lock up our computers and smart devices. This increasing attention on digital security has people asking: Is our personal data truly secure anymore? And what can you do to protect yourself at this point?

SecureWorld can arrange interviews with IT security experts to answer these questions for your audience. With a smaller regional crowd of about 300, attendees can expect more interaction and engagement with presenters and peers.

This is the third year of SecureWorld Chicago, a full-day conference where top minds in the local cybersecurity industry gather for needed training and collaboration. We invite you to join us for access to these practitioners and thought leaders who can help your audience better understand the issues that threaten their security, privacy, and finances.

## Keynotes & Featured Presentations:

“The Nation-State, the Corporation, and You: Cybersecurity in the Cyber Age” COL. CEDRIC LEIGHTON CNN Military Analyst; USAF (Ret.); CEO, Cedric Leighton Associates

“Quantum Computing, Blockchain, AI, STOP - Get Back to the Basics” RICARDO LAFOSSE Chief Information Security Officer (CISO), Morningstar
