

# Thyssenkrupp Elevates Its Project Management with ARES PRISM Software

*Thyssenkrupp Industrial Solutions implements ARES PRISM project controls software in the US to better determine project resources and integrate current systems.*

BURLINGAME, CA, UNITED STATES, May 29, 2019 /EINPresswire.com/ -- Thyssenkrupp Industrial Solutions, Inc., globally established [EPC](#) contractor, has selected ARES PRISM project controls software as the solution for a new project's engineering and [cost management](#) needs. Thyssenkrupp operates in 79 countries and its business operations are divided into five arenas: Components Technology, Elevator Technology, Industrial Solutions, Material Services, and Steel Europe.

Thyssenkrupp selects ARES PRISM enterprise project controls software.

Thyssenkrupp Industrial Solutions, Inc., is implementing ARES PRISM project management software in the US to better determine project resources and [integrate](#) current systems including Primavera and SAP.

ARES PRISM's Cost Management and Engineering modules will be implemented, as well as PRISM Integrator which will integrate with the group's legacy systems. With these solutions in place, Thyssenkrupp will have far better insight into where their resources are allocated and can quickly and conveniently analyze their cost and engineering progress in one place. PRISM will establish earned value management standards for the organization while offering the industry's best in integration, staff planning resource reporting and dashboards.

"It is always exciting when someone tells you what they are looking for in a solution and we are able to immediately check off all the boxes," Geoffrey Stubson, Chief Financial Officer of ARES Project Management, LLC, said. "ARES PRISM is no stranger to the requirements of industrial engineering organizations, and we are happy to provide an integrated solution for Thyssenkrupp Industrial Solutions' needs."

ARES PRISM software is used in all major industries as a project management solution to deliver projects on-time and within budget. Our flexible, pick-and-choose project management software modules include estimating, cost management, engineering management, procurement, document and contract management, field management, executive dashboards, and our integration platform.
