

Global 3D Printing Creation Software Market 2019-2025 by Technology, Trends, Opportunities, Top Key Players and more...

A new market study, titled "Global 3D Printing Creation Software Market Size, Status and Forecast 2019-2025", has been featured on WiseGuyReports.

PUNE, MAHARASTRA, INDIA, May 30, 2019 /EINPresswire.com/ -- [3D Printing Creation Software Market](#)

3D printing i.e. Additive Manufacturing seems like it is a 21st-century concept, but it began three decades ago. It is a group of processes used to create a three-dimensional object where multiple layers of material are placed one on top of the other to create a physical object. It uses computer-aided design (CAD) to create almost any shape or geometry with digital data from 3D models or other electronic data sources like an Additive Manufacturing File (AMF). President Obama himself acknowledged its revolutionary potential in his 2013 State of the Union Address.

Rising use of 3D models and the ability to create customized products anywhere and anytime are expected to be the biggest driver of the 3D printing and thereby 3D Printing Creation Software Market. In the short term, its biggest use is rapid prototyping of complex and customized low-volume goods. With the increase in printing speed, eliminations of object size restrictions, and favorable manufacturing economics, 3D printing will become increasingly important to average consumers in the days to come.

The key players covered in this study

Cura
CraftWare
TinkerCAD
3D Slash
ViewSTL
Repetier
FreeCAD
SketchUP
Simplify3D
Blender
Slic3r
MeshLab
OctoPrint
Meshmixer

The healthcare industry is a focus area for it. The 3D Printing Creation Software Market can help patients print custom-fit hearing aids, orthopedic implants like crowns, bridges and caps, make prosthetic limbs or personal hip/ knee replacements as per an individual's specific needs. The 3D

Printing Creation Software Market can also be utilized by schools and colleges to create 3D models of geographic regions, terrains, sculptures, or historical artefacts. This will improve the learning environment by spiking the student's curiosity and enable them to touch, feel and see a close replica of the actual object without harming the latter.

The three main challenges for the 3D Printing Creation Software Market are those faced by 3D printers themselves – cost, speed and limited materials. While the prices of 3D printers have surely come down since their invention thirty years ago, they still cost more than \$1500 on average. This makes it a difficult investment for people in developing countries with a limited disposable income. 3D printing is a very slow process which takes several hours if not days to print. This makes it unsuitable for any industry like fashion where fast-following or quick fads are the norm. It is also only feasible on thermoplastics, metals, alloys and ceramics at present, limiting its potential greatly.

This report focuses on the global 3D Printing Creation Software status, future forecast, growth opportunity, key market and key players. The study objectives are to present the 3D Printing Creation Software development in United States, Europe and China.

Market segment by Type, the product can be split into

- Plastics Material
- Ceramics Material
- Metals Material
- Others

Market segment by Application, split into

- Aerospace
- Retail
- Medical Devices
- Art
- Architecture
- Engineering
- Jewellery
- Product Design
- Research
- Others

Market segment by Regions/Countries, this report covers

- United States
- Europe
- China
- Japan
- Southeast Asia
- India
- Central & South America

The study objectives of this report are:

To analyze global 3D Printing Creation Software status, future forecast, growth opportunity, key market and key players.

To present the 3D Printing Creation Software development in United States, Europe and China.

To strategically profile the key players and comprehensively analyze their development plan and strategies.

To define, describe and forecast the market by product type, market and key regions.

Table of Content:

1 Report Overview

- 2 Global Growth Trends
- 3 Market Share by Key Players
- 4 Breakdown Data by Type and Application
- 5 United States
- 6 Europe
- 7 China
- 8 Japan
- 9 Southeast Asia
- 10 India
- 11 Central & South America
- 12 International Players Profiles
- 13 Market Forecast 2019-2025
- 14 Analyst's Viewpoints/Conclusions
- 15 Appendix
