Report Details:

This report provides in depth study of “Sports Medicine Market” using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Sports Medicine Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

Sports medicine pertains to the treatment and prevention of injuries resulting from sports and athletic activities. Sports injuries involve both bone and soft tissue injuries. The sports medicine market includes devices that are used for the prevention of sports injuries as well as for the cure, recovery, and rehabilitation of such injuries.

One of the primary drivers for this market is the growing demand for minimally invasive (MI) surgeries. These are the most preferred procedures as they use power tools to carry out surgeries with small cuts, shortens the hospital stay post-surgery, reduces bleeding and recovery time, and enables a faster return to normal activities. There is an increased demand for these surgeries to treat sports complications related to knee, hip, shoulder, elbow, and spine. The rise in the adoption of computer-assisted robotic surgeries and regenerative medicines for lesser recovery time are also propelling the growth of this market.

The U.S., Japan and EU countries are estimated to contribute most of market share as of 2017. Furthermore, North America is expected to dominate the industry over the forecast period. Improvement in the healthcare infrastructure and increasing focus of healthcare providers, towards trauma and related injuries are anticipated to be the vital impact rendering drivers. In 2018, the global Sports Medicine market size was 6190 million US\$ and it is expected to reach 11000 million US\$ by the end of 2025, with a CAGR of 7.5% during 2019-2025.
