The higher focus on quality and product sensitivity in the pharma industry are one of the primary growth factors for this market. The manufacturers in this market focus extensively on the quality of the product, health of the people, and the integrity of the overall process. Manufacturers ensure an optimal experience with the brand to attract and retain customers and ensure that the quality and chemical composition of the pharmaceutical products are maintained. Pharmaceutical manufacturers are dealing with more sensitive products, such as customized treatments for rare diseases. This consequently increases the need to maintain the drugs accordingly since various medicines have a shorter shelf life, greater sensitivity to temperature, and varying levels of demand.

APAC will be the major revenue contributor to the healthcare logistics market by 2021. This is mainly due to the low labor costs and low manufacturing costs, which enable investors to plan their future projects and investments in this region. This region comprises of developed and developing countries with developed infrastructure and medical benefits available to the residents. The increased emphasis on elderly care and home-based healthcare services will result in the increased demand for medical drugs and devices in this region.

In 2018, the global Healthcare Logistics market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2019-2025.
