Description

Alzheimer's disease is a neurodegenerative, progressive, non-reversible disorder. Alzheimer's disease is caused due to abnormal functioning of brain cells i.e. failure of synaptic transmission, resulting in the loss of cognitive functions. Some of the signs and symptoms of Alzheimer's disease are memory loss, insomnia, repetitive movements, agitation, anxiety, depression and loss of reasoning abilities. All memory and mental functioning may be lost in advanced stages of the disease. Alzheimer's disease may lead to death. According to National Institute of Aging, Alzheimer's disease is the common form of dementia.

Population aging across the globe is a major factor driving the market for Alzheimer's therapeutics and diagnostics. Rising life expectancy is contributing to quick increases in number of aged population, and is associated with increased prevalence of chronic diseases like dementia. Therapies for AD offer temporary and uncertain improvements in the well-being of individuals, and none of the approved drugs can modify the course of the disease advancement. Thus, the magnitude of the affected population and lack of suitable and effective treatment offers an incredible opportunity for drug manufacturers.

However, identification of the primary reasons and mechanisms involved in AD are limited. Drug manufacturers have been unable to validate significant clinical benefits of treatment for a numerous of new compounds due to strict regulations. One of the significant trend observed in this market is collaboration of the existing players. Precisely, diagnostic technology companies are carefully trying to bring about effective biomarker technologies to support and improve the drug development process for potential drug candidates which is further expected to propel the demand.

North America dominates the global market for Alzheimer's disease therapeutics due to large number of aging population. Asia followed by the Europe are expected to show high growth rates in the next five years in the global Alzheimer's disease therapeutics market. China and India are expected to be the fastest growing Alzheimer's disease therapeutics markets in Asia-Pacific region. Market segment by Type, the product can be split into

Biomarkers

Cholinesterase Inhibitors

NMDA Receptor Antagonists

Market segment by Application, split into

Hospitals

Clinics

Market segment by Regions/Countries, this report covers

United States

Europe

China

Japan

Southeast Asia

India

Central & South America

The study objectives of this report are:

To analyze global Alzheimers Disease Therapeutics status, future forecast, growth opportunity, key market and key players.

To present the Alzheimers Disease Therapeutics development in United States, Europe and China.

To strategically profile the key players and comprehensively analyze their development plan and strategies.

To define, describe and forecast the market by product type, market and key regions.

Table of Contents

1 Report Overview

1.1 Study Scope

1.2 Key Market Segments

1.3 Players Covered

1.4 Market Analysis by Type

1.4.1 Global Alzheimers Disease Therapeutics Market Size Growth Rate by Type (2014-2025)

1.4.2 Biomarkers

1.4.3 Cholinesterase Inhibitors

1.4.4 NMDA Receptor Antagonists

- 1.5 Market by Application
 - 1.5.1 Global Alzheimers Disease Therapeutics Market Share by Application (2014-2025)
 - 1.5.2 Hospitals
 - 1.5.3 Clinics
- 1.6 Study Objectives
- 1.7 Years Considered

- 2 Global Growth Trends
 - 2.1 Alzheimers Disease Therapeutics Market Size
 - 2.2 Alzheimers Disease Therapeutics Growth Trends by Regions
 - 2.2.1 Alzheimers Disease Therapeutics Market Size by Regions (2014-2025)
 - 2.2.2 Alzheimers Disease Therapeutics Market Share by Regions (2014-2019)
 - 2.3 Industry Trends
 - 2.3.1 Market Top Trends
 - 2.3.2 Market Drivers
 - 2.3.3 Market Opportunities
