

Japan Lawn Mowers Market – Opportunity and Growth Assessment 2019–2024

The lawn mowers market in Japan is likely to reach over \$850 million

CHICAGO, IL, UNITED STATES, June 4, 2019 /EINPresswire.com/ -- The [lawn mower market in Japan](#) is driven by factors such as growing interests in backyard beautification, introduction of models with ease of usage, and increased adoption of robotic models with connectivity and smart features such as lawn mapping and navigation. The report provides an in-depth market and segmental analysis of the lawn mower market by products, end-users, distribution channels, and fuel type.

The lawn mowers market in Japan is likely to reach over \$850 million, registering an absolute growth rate of 37% in 2018–2024. The country is home to customers with high affinity toward technology and innovative products. The presence of several gardens and recreational parks in the country tends to drive the growth of the lawn mowers market.

Key Highlights of the Report:

The walk-behind mowers segment (in terms of unit shipments) accounted for a majority share of over 90% of the lawn mowers market in Japan.

The robotic mowers segment is projected to grow at a high CAGR of over 25% during the forecast period.

Walk-behind mowers are growing in popularity primarily due to better after-cut appearance.

The standard ride-on lawn mowers segment dominated the market and accounted for over 50% revenue share of the ride-on market in 2018.

The presence of local vendors such as Honda, Ryobi, and Makita in the country has resulted in a
