Gluten-free Pet Food Market – 2019

Wiseguyreports.Com Adds "Gluten-free Pet Food -Market Demand, Growth, Opportunities And Analysis Of Top Key Player Free Sample Report Forecast To 2025" To Its Research Database.

## Report Description:

Gluten is a storage protein primarily found in rye, barley, and wheat. The main problem with gluten is that it causes Celiac disease, which is a hereditary allergic disease. This disease is also detected in pets and is a result of pet foods containing gluten.

Gluten-free pet food is a new segment in the overall pet food industry, and hence represents significant potential to replace regular pet foods. Gluten-free pet food contains more nutritional ingredients as compared to general pet foods, and is also offered in a wider range of flavors, which is expected to drive popularity among pet owners to a significant extent.

Markets in countries in Asia Pacific are fairly untapped and represent high potential opportunities for gluten-free pet food manufacturers, and revenue from the market in this region is expected to be substantially high in the near future.

United States and Europe are currently the largest markets for gluten-free pet food products, as both producers and consumers, followed by Asia Pacific. Pet food manufacturers in United States offer gluten-free pet food in markets in countries in Europe, while there are no gluten-free pet food manufacturers in Europe.

The global Gluten-free Pet Food market is valued at xx million US\$ in 2018 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2019-2025. The objectives of this study are to define, segment, and project the size of the Gluten-free Pet Food market based on company, product type, end user and key regions.
