Description

The utility sector, including electricity power plants, oil & gas, water firms, and other integrated firms, provides general services required on daily basis to end users. The market incorporates cyber security and physical security to maintain the privacy of data collected from various sectors. Cloud-based services are widely adopted by large enterprises and government organizations to ensure safe and easy-to-access centralized system for data storage.

Cloud-based enterprises are widely adopted by large companies and government organizations to ensure a safe and easy-to-access centralized system for data storage. Also, employees around the world can use cloud-based services to access large volumes of data without time and location constraints. Moreover, cloud-based services ensure lower cost of ownership along with easier and improved methods of managing the complexities involved with large data volumes. Therefore, the growing adoption of cloud-based services will propel the growth prospects of the utilities security market until the end of 2023.

The Americas held the largest share of the market with more than 45% share owing to the high rate of adoption of security devices in 2017. Factors such as the early adoption of advanced technologies and availability of adequate infrastructure and the presence of numerous global vendors are estimated to spur this market's growth prospects in the Americas in the coming years.
