Power Transmission, Control, Distribution Market By Product Type (Power Transmission, Control, Distribution And Power Generation) Trends & Market Information

LONDON, GREATER LONDON, UK, June 8, 2019 /EINPresswire.com/ -- The global market for power transmission, control, and distribution is expected to reach a value of nearly above \$4.2 trillion by 2022, having grown at an annual rate of above 3% since 2018.

The Power Transmission, Control, And Distribution Market Is Expected To Grow At A CAGR Of Around 3% To Nearly \$4,264 Billion By 2022"

Abdul Wasay

Growth in the historic period resulted from rise in power consumption and regulatory changes to boost electricity transmission and distribution. Going forward, investments in renewable energy, economic growth, increasing demand for electricity from manufacturing, growing use of electricity in transportation will drive growth. Factors that negatively affected growth in the historic period were

electricity transmission and distribution losses and rise in debts. Factors that could hinder the growth of this market in the future are aging power transmission and distribution infrastructure, interest rate increases and environmental regulations.

Electric power transmission, control, and distribution includes establishments involved in operating electric power transmission and distribution systems that control the transmission of electricity from the source to consumers.
