

XTI Aircraft Company Announces Additional Orders for the TriFan 600 Hybrid-Electric Vertical Takeoff Airplane

Pre-sales program orders now at 80 airplanes

DENVER, CO, USA, June 12, 2019 /EINPresswire.com/ -- [XTI Aircraft Company](#) (XTI) announced today that customers in North America and Australia have placed additional orders for the [TriFan 600](#) vertical takeoff airplane under XTI's pre-sales program.

"This brings our total to 80, representing over a half billion dollars in future revenues," said Robert LaBelle, Chief Executive Officer of XTI. "The new orders come on the heels of our successful initial hover tests, which we announced on May 8," LaBelle continued, "and our sales and service agreement with Heliflite in Australia. There has been an increase in the level of interest since we began the flight test program."

This brings our total to 80, representing over a half billion dollars in future revenues”

XTI CEO Robert LaBelle

“Two orders are from Heliflite, our new partner in sales and service in Australia, New Zealand, Oceania, Indonesia and the Philippines” said LaBelle. “As our development program progresses, operators and others increasingly see the value proposition of our unique and revolutionary airplane with its cleaner state-of-the-art hybrid-electric propulsion system, extremely low operating costs, and patented technology, vertical takeoff combined with the

ability to fly long-range and the speed and comfort of a business aircraft.”

The company has consistently grown the number of orders from customers around the world, beginning with the first orders at the 2017 Paris Air Show. This was followed by orders at the October 2017 and October 2018 NBAA conventions.

The TriFan 600 is a major breakthrough in aviation and air travel. The six-seat TriFan 600 will have the speed, range and comfort of a luxury business aircraft and the ability to take off and land vertically, like a helicopter. It will travel at 345 miles an hour, with a range of up to 1,200 miles. Using three ducted fans, the TriFan lifts off vertically. Its two wing fans then rotate forward for a seamless transition to cruise speed and its initial climb. It will reach 30,000 feet in just ten minutes and cruise to the destination as a highly efficient business aircraft.

XTI launched a formal stock offering in 2016 under SEC Regulation A+, which is open to all

unaccredited and accredited investors around the globe. Shares in XTI may be purchased at www.startengine.com/xti-aircraft providing a unique opportunity for the general public to invest in an aerospace company with a game-changing product, a world-class leadership team, and significant growth potential.
