

Worldwide Healthcare Services Market Overview, Share, Value Research Report

The Business Research Company offers Healthcare Services Market Segment By Type, By End User Gender, By Geography - Global Forecast To 2022 to its report store

LONDON, GREATER LONDON, UK, June 11, 2019 /EINPresswire.com/ -- The global market for healthcare services is expected to reach a value of nearly above \$9 trillion by 2022, having grown at an annual rate of above 9% since 2018.

Healthcare Services Market Segment By Type (Hospitals And Clinics, Physicians, Nursing Care, Dental Services, Laboratory Services, Ambulance Services And Others), By End User Gender, By Geography "

Abdul Wasay

Growth in the historic period resulted from rapid growth in the size of elderly populations, strong economic growth in emerging markets, health insurance reforms and home care/monitoring. Factors that negatively affected growth in the historic period were low healthcare access, and shortages of skilled human resources.

Going forward, faster economic growth, technological developments, changes in lifestyles and improved survival and quality of life will drive the growth. Factors that could

hinder the growth of this market in the future are government regulations, interest rate increases and government provisions in healthcare services.

The global healthcare services market is highly fragmented. The top competitors in the global healthcare services market include National Health Service, Kaiser Permanente, Fresenius Medical Care AG & Co. KGaA, Community Health Systems, Inc., DaVita Inc., Universal Health Services, Inc.

As a major trend, mobile and IoT technologies are being implemented by hospitals to provide

information to the stakeholders in the hospital ecosystem. This technology offers real time visibility of patient health through active and passive data collection. This technology can monitor medical conditions and prevent life threatening diseases. It enables healthcare providers to make accurate and informed decisions on patients' health. Data generated through IoT devices is becoming critical for patient care managers, and patients to diagnose, track and treat medical conditions. Major hospitals adopting IoT technology in the USA include HCA, Mercy Virtual Care Center and Kaiser Permanente.
