

Cable Matters introduces a Dual 4K Video USB-C™ Docking Station for the MacBook Pro®

Cable Matters Dual-Input USB-C Dock with 80W Power Delivery provides a clever and economical solution for MacBook Pro users to connect two 4K HDMI® monitors.

SOUTHBOROUGH, MA, UNITED STATES,

June 11, 2019 /EINPresswire.com/ -- [Cable Matters®](#), an industry-leading supplier of connectivity solutions, announced a new addition to their line of custom-designed USB-C products. The Cable Matters [Dual-Input USB-C Docking Station](#) with Dual 4K Video & 80W Power Delivery provides a

clever and economical solution for MacBook Pro users to connect two 4K monitors with HDMI®. Unlike other USB-C docking stations, this USB-C docking station uses two USB-C ports to support a second display with the MacBook Pro.

USB-C is becoming the standard connectivity port on smartphones, tablets and computers. This unique Dual-Input USB-C Docking Station offers an affordable option, especially for MacBook Pro owners."

Jeff Jiang, President of Cable Matters Inc.

USB-C Dongle Dilemma

Notebook users face the challenge of connecting voice, data, and Ethernet networking to the latest Mac and Windows notebooks with only USB-C or Thunderbolt™ 3 ports. Bandwidth ranges from 40Gbps on a Thunderbolt 3 port to 10Gbps on a USB-C port. Notebook charging, data transfer and external video require plugging and unplugging multiple cables and adapters for each function.

Organize your desktop and reduce stress on your USB-C ports with this Dual-Input USB-C Docking Station.

Plug & Play at Dual 4K

While other USB-C docking stations use video graphics drivers or other PC technology to support dual video, this Dual-Input USB-C Docking Station uses two USB-C ports to connect two 4K monitors. The MacBook Pro or MacBook Air® with Retina® display can mirror or extend to both displays without fear of losing compatibility with a macOS® software update.

Throttle Up or Down with a Dynamic Bandwidth Switch

A 4K/30Hz or 4K/60Hz switch adjusts the bandwidth to support different video resolution settings and data transfer rate speeds with the following options:

1. Two 4K@60Hz displays with a data transfer rate limited to USB 2.0 (480Mbps) speed with 480Mbps Ethernet

2. One 4K@30Hz + One 4K@60Hz display, full USB 3.0 and USB 3.1 data transfer speeds, and Gigabit Ethernet

Dual HDMI Video Display Examples:

- 8840x2160@60Hz + 3840x2160@60Hz Displays (4K/60Hz Mode)
- 8840x2160@30Hz + 3840x2160@60Hz Displays (4K/30Hz Mode)
- 2560x1440@60Hz + 3840x2160@60Hz Displays (4K/30Hz Mode)

- 1920x1200@60HZ + 3840x2160@60Hz Displays (4K/30Hz Mode)

Economical 12-Port Command Center Thunderbolt 3 docking stations can cost up to 50% more than this Dual-Input USB-C Docking Station while still requiring an adapter for the second display. This USB-C docking station maximizes your investment with support for a MacBook Pro and Windows® PC with Thunderbolt 3, a Google Pixelbook®, or another computer with only USB-C.

Dual-Input USB-C Docking Station Functions:

- Dual HDMI Video
- 80-Watt Power Delivery
- microSD and UHS-II SD Card Readers
- Ethernet Networking
- USB-A & USB-C Gen 2 Data & Charging
- Audio In/Out

See the Future with USB-C
 “USB-C is becoming the standard connectivity port on smartphones, tablets and computers. Our Cable Matters design and engineering teams closely track industry developments to provide cost-effective solutions for video, data and power delivery over USB-C. This unique Dual-Input USB-C Docking Station offers an affordable option, especially for MacBook Pro owners.” - Jeff Jiang, President of Cable Matters
