

FogChain's Trident Platform Completes Integration with Application Monitoring Service

FogChain is excited to announce that it has achieved another major milestone with its latest release of Trident.

SAN CARLOS, CA, UNITED STATES, June 13, 2019 /EINPresswire.com/ -- FogChain's Trident Platform Completes Integration with Application Monitoring Service

VANCOUVER, BC and SAN CARLOS, CA / (OTCQB: [FOGCF](#); CSE: [FOG](#); FRA: MUU3) FogChain Corp ("FogChain" or the "Company") is excited to announce that it has achieved another major milestone with its latest release of Trident.

The development team has completed the integration of [AppMon](#), a 24/7 application monitoring solution that identifies performance issues, into the Trident platform. Trident "Test" customers can now use the monitoring solution to schedule recurring tests within a single dashboard that includes important information such as open/current incidents on all devices monitored; a weekly summary of success, failure and availability; performance graphs; and notifications relative to any performance issues.

Trident's latest release will have the ability to manage local/cloud devices, test scripts (codeless), alarms, and servers, and view all important reports within a single dashboard with a mobile friendly design. The development team has also updated scheduling services to allow a user to deploy all of these capabilities within a single containerized structure.

Patrick Quilter, Chief Strategy Officer, commented, "With this release, Trident customers will be able to proactively monitor applications of all types and resolve issues before they affect their end users. Monitoring occurs on real iOS and Android devices to understand the customer experience, increase mobile app ratings and drive business outcomes." FogChain's CEO, James Cerna, commented, "This latest release of Trident truly provides developers and enterprises alike with the tools and resources to test and monitor their applications with a high degree of proficiency and cost savings with one of the leading technologies in the marketplace. Our development team has done a stellar job in creating this integrated solution and delivering a commercial-grade suite of services that is unparalleled in the industry, with several of our clients already benefiting from Trident's capabilities."

The image shows the FogChain logo, which consists of a stylized green and black geometric shape resembling a trident or a network node, followed by the word "FogChain" in a bold, black, sans-serif font. Below the logo is a horizontal line with a green gradient. Underneath this is a screenshot of a web application interface. The interface features a dark blue background with a network of white nodes and lines, suggesting a global or distributed system. In the center, there is a white sign-in form with the following fields: "Username", "Password", and a "Sign In" button. Below the button, there is a link that says "Don't have an account? Sign Up". The text "© 2018 FogChain" is visible at the bottom of the screenshot.

Build, Test & Monitor Your Apps Hassle Free At Scale

Performance Monitoring for Web and Mobile Apps

With this release, Trident customers will be able to proactively monitor applications of all types and resolve issues before they affect their end users."

Patrick Quilter, Chief Strategy Officer

About FogChain Corp.

FogChain (OTCQB: FOGCF; CSE: FOG) is a fully integrated, end-to-end software development life cycle (SDLC) and quality assurance solutions provider. With its high-performance application development, testing and monitoring platform, Trident, FogChain's suite of services and technology provides application development at scale with greater speed, greater efficiency and at a lower cost. The explosive demand for more edge computing and security within the Micro-Service, IoT, mobile data and driverless vehicle space places FogChain's Build-Once-

Deploy-Everywhere software architecture as a leading ecosystem of tools and resources for developers that bridge devices and operating systems and the ability to build and launch exciting new applications in a unified environment. Led by a team of Cloud and SaaS veterans, FogChain is uniquely positioned to be a leader in the next super wave of the global software development market.

FORWARD LOOKING STATEMENTS

This news release contains "forward-looking information" and "forward-looking statements" (collectively, "forward-looking statements") within the meaning of the applicable Canadian securities legislation. All statements, other than statements of historical fact, are forward-looking statements and are based on expectations, estimates and projections as at the date of this news release. Any statement that involves discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions, future events or performance (often but not always using phrases such as "expects", or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "budget", "scheduled", "forecasts", "estimates", "believes" or "intends" or variations of such words and phrases or stating that certain actions, events or results "may" or "could", "would", "might" or "will" be taken to occur or be achieved) are not statements of historical fact and may be forward-looking statements. In this news release, forward-looking statements relate, among other things, to: the terms and conditions of the Transaction; use of funds; and the business and operations of the Company. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable, are subject to known and unknown risks, uncertainties, and other factors which may cause the actual results and future events to differ materially from those expressed or implied by such forward-looking statements. Such factors include, but are not limited to: general business, economic, competitive, political and social uncertainties; and the delay or failure to receive board, shareholder or regulatory approvals. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on the forward-looking statements and information contained in this news release. Except as required by law, the Company assumes no obligation to update the forward-looking statements of beliefs, opinions, projections, or other factors, should they change, except as required by law.
