

MobilDrTech Partners with BodiMetrics to Bring RPM Home

MobilDrTech partners with vitals device maker BodiMetrics™ to market FDA 510k approved VitalsRx Monitor with spot vitals and continuous ECG and SpO2 monitoring.

HOUSTON, TEXAS, USA, June 13, 2019 /EINPresswire.com/ -- [Remote Physiologic Monitoring \(RPM\) and Chronic Care Management \(CCM\)](#) are two rapidly growing areas of medicine. In early 2018, CMS "unbundled" the CPT code for Remote Patient Care, 99091. This separated qualifying services from existing telehealth and telemedicine reimbursement guidelines. This has opened the door for healthcare providers to be reimbursed for some RPM services including data collection and care coordination for patients, including those at home.

[MobilDrTech, Inc.](#) and BodiMetrics™ announce a strategic partnership to market professional and consumer grade collection and analysis of health vitals with pocket-sized devices to improve management of chronic conditions, enhance quality of fitness and wellness programs and optimize clinical trials and research.

[VitalsRx](#) Features and Metrics

- 20 Second ECG Waveform
- Continuous ECG to 24 Hrs - 24 Hour Holter Monitoring
- 20 Second SpO2 Capture
- Continuous SpO2 to 15 Hrs - Overnight Screening for Sleep Apnea
- Heart Rate & Variability
