

# Aerial Equipment an Indicator for Rental Growth Trajectory

*Aerial equipment serves an indicator of good and bad times to come, especially in construction, civil, and industrial applications.*

SAN ANTONIO, TEXAS, UNITED STATES, June 12, 2019 /EINPresswire.com/ -- A new analysis by [Verify Markets](#) shows the [North American Aerial Equipment Rental Market](#) was valued at \$15.7 billion in 2018 and is expected to reach revenues of over \$20.0 billion by 2025. Aerial equipment is an established part of the North American rental landscape. Aerial equipment is generally a large portion of the fleet for equipment rental companies, and serves an indicator of good and bad times to come, especially in construction, civil, and industrial applications. The aerial equipment rental marketplace is a highly fragmented without a single stakeholder controlling more than 15 percent market share.

The aerial equipment market is projected to experience a steady growth rate during the next seven years. Growth is expected to be driven by demand from construction, as well as industrial/retail end-user markets, a shift towards rental, and a response to labor and skills shortages.

“

The aerial equipment rental marketplace is a highly fragmented without a single stakeholder controlling more than 15 percent market share.”

Verify Markets Market Research and Consulting

Anthony Miller, Managing Partner of Verify Markets

In recent years, major acquisitions have impacted the aerial equipment markets in the U.S. and Canada considerably. Acquisition activity has been relatively high among firms of all sizes, but this is especially true for larger firms. The larger firms have more access to financing and can more easily absorb the footprint, IT systems, and other aspects of the acquired infrastructure.

The North American Total Equipment Rental Market is a highly fragmented and competitive space with a handful of larger public rental firms and many smaller independent players. Demand for rental equipment and, specifically,

aerial equipment is strongly correlated with economic cyclical and commercial construction trends.

This study aims to provide a detailed analysis of the North American Aerial Rental Market with competitive analysis for the United States and Canada. Market forecasts are provided for each country from 2018-2025. Total equipment rental revenues and aerial equipment rental revenues are estimated for 2018, as well as major trends, fleet breakout by piece count, fleet breakout by value, technology and regulation impacts, market challenges, and competitive profiles for United Rentals, Sunbelt Rentals, Herc Rentals, and Ahern Rentals.
