

TEDOR Pharma Selects AssurX Quality Management Software to Automate and Streamline Processes

TEDOR expects to gain operational efficiencies for future growth using the AssurX platform

MORGAN HILL, CA, UNITED STATES, June 19, 2019 /EINPresswire.com/ -- [AssurX](#), Inc., a leader in enterprise quality management software today announced that oral solid dose contract development and manufacturing organization ("CDMO") [TEDOR Pharma Inc.](#) has selected the AssurX platform to fully automate their quality and compliance management processes. TEDOR will use a combined solution of document, training and audit management, change control, supplier quality, CAPA, quality events, deviations, and lab investigations to bring further consistency, accessibility, and efficiencies to their business.

"We are a fast-growing company and our systems need to be ahead of our growth," said David Vario, Vice President of Quality and Regulatory Affairs at TEDOR. "By having these processes automated and connected, we can be more efficient and compliant in our quality system activities."

Since the AssurX platform gives customers the ability to use pre-configured workflows as well as develop their own unique processes, Vario plans to launch a preventive maintenance calibration process to provide a break/fix audit for all equipment within their facilities.

"TEDOR Pharma is using the built-in, core strengths of our product and then extending its use to meet other business requirements. This is made possible because the AssurX platform is intuitive to both developers and non-developers alike. It's what the company was founded on and what we continue to give our customers as our product evolves," said Tamar June, AssurX President and CEO.

Vario says that having all the processes in one central system will provide additional benefits to TEDOR's customers with Annual Product Reviews (APR) that can be prepared quickly. "Our customers have to provide the FDA and other regulatory agencies with a yearly review and with a click of a few buttons, we can now generate the manufacturing portion of APR for them since all the information will be in the AssurX platform."

ABOUT TEDOR PHARMA

Founded in 2001, TEDOR Pharma is a specialized Contract Development and Manufacturing Organization (CDMO) with a strong track record of success in providing development and manufacturing services for oral solid dose products, including DEA-scheduled products, for life science customers. Among our service offerings is FLEXITAB(TM), which produces extended release tablets that can be taken intact or broken cleanly and precisely. Over nearly two decades, TEDOR has helped customers meet their project timelines, achieve regulatory approvals, and solve formulation challenges, from development through to large-scale manufacturing.
