"The Preview Channel™ is delighted to be carried on Samsung, one of the early pioneers and one of most innovative Smart TV manufacturers in the media marketplace and we are proud to become part of their family" said Sager.

This Summer TPC will begin to also be distributed internationally in France, Germany, Spain, the UK, Brazil and Italy and the channel is carried on 1 million T-Mobile Metro PCS mobile phones (in the 'Metro Play' section). Sager further noted: "we are also testing the channel with a large television broadcaster here in the U.S. for OTA and cable must carry coverage nationwide."

Among other TPC developments Sager added that: "We will be integrating a 'first' alert system (SMS/Text) so fans can get texts the second their favorite trailers first debut on the channel and we are also voice-enabling the channel so you can make requests to find certain star interviews or request specific programs by simply asking 'Alexa'."

The initial response from movie and video game fans on [XUMO Smart TVs](#) has been excellent with TPC ranking consistently in the top 10 'most popular' of Xumo's 166 channels.

The Preview Channel™ is endeavoring to build an unique television experience for movie, TV and video game enthusiasts by ultimately making on demand access available to one of the largest library of trailers and movie and TV- related content consisting of 50,000 classic movie trailers (from the 40's to present) - 7,000 behind-the-scenes star and director interviews - 50,000 movie clips - 7,000 video game trailers and 20,000 classic TV trailers.
