

# Stealth Added to SouthXchange, Argentina's Premier Cryptocurrency Exchange

*Stealth XST now available in multiple trading pairs on award-winning South American exchange*

DOVER, DE, USA, July 1, 2019 /EINPresswire.com/ -- The [Stealth](#) team is pleased to announce their recent integration onto the [SouthXchange](#) platform. Available XST trading pairs on SouthXchange include BTC, USD, USDT, LTC and DASH.

Stealth is currently trading on multiple exchanges including Bittrex, Vinex, Bitinka, and now SouthXchange. Additional market integrations are in process in anticipation of the full release of the new Quantum Proof-of-Stake development in several months.

Quantum Proof-of-Stake ([qPoS](#)) is the new groundbreaking technology behind the Stealth cryptocurrency. QPoS represents a key breakthrough to achieve the holy grail of crypto; fast, feeless and private transactions on a platform scalable to thousands of transactions per second.

Now successfully in testnet, the qPoS code has recently been published to GitHub and is available for public review.

Stealth's unique, public blockchain was launched in 2014, and their lead developer, Dr. James Stroud, recently presented at both Consensus New York and Elev8 Los Angeles, discussing their latest development milestones, including their new proof-of-stake consensus protocols.
