Smaller brands are vying to enter the consumer goods sector by presenting goods in a specific way that addresses the problem areas of consumers. These brands are making use of big data analytics to understand the behavior of consumers who purchase online.

The ever-expanding consumer goods industry is nothing without supply chains that are efficient, agile, and sustainable. To cater to fast order requirements of consumers, greater visibility and control is required over multiple channels. Consumer goods companies are bridging the existing gap between operational processes and sales planning by deploying integrated supply chain management. Improvements in supply chain and logistics help consumer goods companies to address their most complex operational issues ranging from transportation to management services.
