Medical Equipment

Medical equipment makers include companies that manufacture basic, familiar products like forceps, bandages, scalpels, gloves and those that are in exhaustive researches and manufacture high-quality, high-tech equipment like surgical robots and MRI machines.

Healthcare Facilities

A health facility refers to any location that provides healthcare. These facilities can be either small clinics and doctor's offices or large hospitals and urgent care centers that have elaborate trauma centers and emergency rooms.

Drugs

Drug manufacturers can be segmented based on major pharmaceutical's firms, makers of generic drugs and biotechnology firms. The biotech industry includes numerous companies that indulge in research and development to develop new devices, treatment methods and drugs. Established pharmaceutical's firms are also focused on research and development however, they usually focus more on manufacturing and than advertising an existing range of drugs compared to typical biotech firms.
