The healthcare industry comprises companies that offer medical services, manufacture drugs or medical equipment, sell medical insurance, or provide healthcare services to patients.

Aging populace as well as expanding global population, high prevalence of chronic diseases, rapid advances in innovative and digital technologies along with other developments, are accelerating health care demand as well as expenditures. Stakeholders in the healthcare industry include governments, providers, consumers, payers, and various other companies that are involved in managing operational, financial and clinical challenges. These stakeholders strive for a future where new businesses, as well as care delivery models, backed by digital technologies, could aid in solving today's challenges and also build a sustainable space for accessible, affordable, top-quality health care. This optimistic future could very soon be a reality only when all these stakeholders take proactive steps in shaping the future, by focusing not just focusing on a system of caring for a sick patient when they are ill but also on a kind of health care that stresses on prevention, early intervention, and well-being.

In general, a health facility refers to any location that provides healthcare. These facilities can be either small clinics and doctor's offices or large hospitals and urgent care centers that have elaborate trauma centers and emergency rooms.
