

ACOEM expands its smart cities presence through acquisition of Air Monitors Ltd in the UK

ACOEM has accelerated international expansion plans with the acquisition of Air Monitors Ltd, the exclusive distribution partner of ECOTECH products in the UK.

LONDON, ENGLAND, UNITED KINGDOM, July 8, 2019

/EINPresswire.com/ -- [ACOEM Group](#) has accelerated its international expansion plans with the acquisition of [Air Monitors Ltd](#), the exclusive distribution partner of [ECOTECH](#) products in the United Kingdom.

Felicity Sharp, Head of ECOTECH Europe & Jim Mills, Founder of Air Monitors Ltd

Air Monitors Ltd represents many of the world's leading environmental technology manufacturers and is recognised by leading government and industry bodies for its expertise in air quality monitoring technologies that help determine the impact of air pollution.

“

I look forward to working with more cities to plan and deliver similar environmental monitoring initiatives for which there is an enormous need and growing demand.”

Jim Mills - Founder of Air Monitors Ltd

Jim Mills, founder and managing director of Air Monitors Ltd, was instrumental in the recent implementation of an air quality monitoring program in London, described by C40 Cities as ‘the world’s most sophisticated air quality monitoring system’. The Breathe London initiative, launched in January 2019, is a world-first project using AQMesh™ hyperlocal small sensor air quality monitoring technology to map air pollution levels and collate detailed analytical data to better understand the issue.

“I look forward to working with more cities to plan and deliver similar environmental monitoring initiatives for which there is an enormous need and

growing demand," said Jim Mills, Founder of Air Monitors Ltd.

ACOEM Group has grown to become a world leader in environmental monitoring solutions, having merged in 2017 with Australian company ECOTECH, a globally recognised leader in air quality monitoring. ECOTECH has had a relationship with Air Monitors Ltd for more than 15 years, leading to its exclusive distribution partnership.

The business expansion allows ACOEM, now reaching more than 100 M€ turnover, to continue its mission of protecting the environment using a complementary air, noise and vibration product portfolio, and deep expertise in delivering significant projects that help smart cities, companies and public authorities reduce their environmental impact.

"We are committed to delivering world-class air monitoring experiences that support the growing smart city evolution in the UK market and around the world. Through the acquisition of Air Monitors Ltd, we look forward to strengthening our market presence and accelerating our growth plans," commented Fabien Condemine, ACOEM CEO.

Felicity Sharp, who joined ECOTECH in 2006 and has been head of ECOTECH Europe since 2018, will step into the role of managing director.

"This is an exciting time for ACOEM as we continue to support our ECOTECH customers and boost our UK market presence under the wider ACOEM product and service offering," said Felicity Sharp.

Air Monitors Ltd founder and managing director Jim Mills will work closely with Air Monitors Ltd as part of the ACOEM Environment team, continuing to build on the smart cities strategy for the organisation globally.
