Market players
Market Summary

Overview

The hospitality industry is growing at around 4.3% per year versus 3.0% for the total global economy. Hotel management software is technology that allows hotel operators and owners to streamline their administrative tasks while also increasing their bookings in both the short- and long-term. The rapidly changing trends in consumer behavior and technology are expected to open new markets and opportunities.

Value

The global hotel and hospitality management software market was valued at around USD 2,800 million in the year 2016 and it is expected to reach approximately USD 4,300 million by 2022. The global hotel and hospitality management software market is expected to grow at a CAGR of over 6.5% between 2017 and 2022.

Drivers and Restraints

the rapid growth in the tourism and hospitality industry has played a major role in driving the hotel and hospitality management software market. An increased adoption of the hotel and hospitality management software is expected in the coming years owing to the increasing need to minimize the expenditure and the operational costs. The other benefit of using the software is that it reduces the dependency on the manual processes.
