#### Latest Update Of ICT Industry 2019 :-

Driven by key companies such as Qualcomm, Huawei, and Apple, eSIM has been launched to make smart devices more independent from that of smartphones, thereby boosting the growth of smartwatches at a much quicker pace compared to smart bracelets. It has been embedded in smartwatches and connected to computers for internet connection. More applications are likely to adopt it to enable functions such as virtual assistant, sending messages, making calls, streaming music, and more.

Smart speakers are another trend that will stay in the spotlight, grabbing attention to applications that enables voice interaction such as smart headsets, smart TVs, and vehicles.

Looking forward, growing number of applications will allow voice interaction, including voice shopping, voice recognition, voice assistant, among others. Companies are likely to continue developing new voice-activated apps for exploring the market potential.

Machine Learning and Artificial Intelligence will expand their presence in numerous sectors. AI tools will empower in interpreting data and predicting the future, offering various benefits. Rapid advancements have been made in AI, particularly in knowledge management, big data analytics, and machine learning. Progress in connectivity as well as cloud technology is paving the way for sharing and distribution of machine intelligence at pocket friendly prices.
