

The Latest Innovations in HPAPI Manufacturing Technologies

A focus on alternative HPAPI manufacturing technologies

LONDON, UNITED KINGDOM, July 9, 2019 /EINPresswire.com/ -- SMI's inaugural Highly Potent Active Pharmaceutical Ingredients USA Conference, will focus on the latest innovative manufacturing technologies with a special spotlight presentation on effective and safe containment solutions for biologics based HPAPIs, along with cleaning and cross contamination requirements.

Keith Jensen, Owner and Consultant at Keith Jensen Consulting, previously at Novartis-MIT Center for Continuous Manufacturing, discusses alternative HPAPI manufacturing technologies to reduce powder exposure and improve safety enabling continuous manufacturing. Other points to be discussed include:

- Alternative drug manufacture through nanocrystal formulations, thin films and hot-melt extrusion/injection molding that reduces HPAPI powder exposure and improve safety
- Step-by-step processes along with the equipment needed to achieve alternative HPAPI manufacturing techniques

Richard Denk, Head of Sales Containment from SKAN focuses on:

- Regulatory requirements for highly potent biologics-based Pharmaceuticals
- Requirements for aseptic manufacturing and Containment
- Cleaning and Cross Contamination Requirements

Also, up for discussion will be emerging bispecific HPAPI therapy, from development to

A promotional banner for the 'Highly Potent Active Pharmaceutical Ingredients BOSTON, USA' conference. The banner features a background image of a person in a white lab coat and hood using a pipette. Text on the banner includes: 'SMI Presents the Inaugural Event', 'Highly Potent Active Pharmaceutical Ingredients BOSTON, USA', 'OCTOBER 21-22, 2019', and 'WWW.HPAPI-USA.COM'. Below the banner, the text 'HPAPI USA 2019' is displayed.
