Consumer goods are products largely consumed by the average consumer in their daily lives. Consumer goods are widely referred to as final goods since it is the end result of manufacturing, production, and distribution. Consumer goods are generally found on the store shelf. Food, jewelry, and clothing are all examples of consumer goods. Raw materials such as copper or iron, are not considered as consumer goods since they need to undergo several processes to get transformed into usable end products.

Consumer goods, or final goods, are products sold to consumers for their own enjoyment or use. They are not meant for further commercial production activity. From an economic viewpoint, consumer goods can be categorized as nondurable (usable for less than 3 years), pure services (these are meant for immediate consumption), and durable (usable within and after 3 years). Marketers have segregated consumer goods how consumers shop for them, how frequently consumers shop for them, and according to consumer behavior. In more precise terms, consumer goods can be classified into shopping, convenience, unsought goods, and specialty.
