Latest Update Of ICT Industry 2019 :-

There is a significant demand for various types of information and technology services. Over the years, the global economy has grown at an impressive rate, which has reflected favourably on the information and technology sector. Demand for IT services is expected to grow further in the forthcoming years with emerging markets accounting for a relatively higher shares in terms of

revenue. Fast adoption of these services in both advanced and developing countries is creating tremendous market opportunities. Fast growing economies such as India, China are expected to remain attractive investment destinations for market players in the forthcoming years. This is mainly attributed to the rapid infrastructural development and digitization. Integration of software technologies in large-scale sectors present in these countries is providing an impetus to the market.

Rapid digitization worldwide is aiding in expansion of the application area of various types of IT services. Verticals such as healthcare, manufacturing, retail, oil & gas, automotive, aerospace, among others are undergoing rapid technological evolution, which is supporting the market growth. Factors such as growing need for application management solution, rapid systems integration, arrival of custom application, faster web development, and infrastructure management are proving tail winds to the market. Similarly, expanding internet userbase, improvement of network infrastructure in third-world countries, sound availability of skilled workforce, development of new policy frameworks are other competitive factors supporting the growth of the global IT industry.
