Latest Update Of Business Service Industry 2019 :-

Business services are the services sold to organizations. The basic value of business services is intangible and has no physical form. They comprise of vast industry and have a common business model. Companies which are involved in the business services industry offer support services across businesses and consists of security services, hiring and placing of personnel, office administration, travel arrangement, cleaning, and waste disposal. Information technology is a vital business service and encourages other business services such as finance, procurement, and shipping.

Financial services are generally offered by the organizations who deal with money management such as banks, investment banks, insurance companies, credit card companies, and stock brokerages. Financial services also deal in the field of the estate, securities, and agency services, and all types of financial intermediation. The current ongoing trends in the financial services industry focus on the implementation of web and mobile connectivity, along with the risk of attack from online attackers. Banking services previously relied on brick and motor buildings in order to facilitate transactions. The BFSI sector has now introduced mobile applications, which has brought financial services to the doorsteps of the customers. Customers do not require to visit the bank personally. With the emergence of blockchain technology, the financial services industry is highly embracing it, as it offers benefits in terms of operating costs as well as security.
