Cloud Services Brokerage (CSB) Market - 2019-2025

## Report Summary:

Cloud services brokerage (CSB) is an IT role and business model in which a company or other entity adds value to one or more (public or private) cloud services on behalf of one or more consumers of that service via three primary roles including aggregation, integration and customization brokerage. A CSB enabler provides technology to implement CSB, and a CSB provider offers combined technology, people and methodologies to implement and manage CSB-related projects.

The CSB market has been segmented by platform into internal brokerage enablement and external brokerage enablement. These internal enablement platforms empower enterprises to provide a unified multi-cloud governance and management experience to their employees. Enterprises utilize internal brokerage enablement platforms for unifying security, policy enforcement, license management, and employee usage monitoring across cloud services. Hence, the CSB market for internal brokerage enablement is expected to hold a larger market size during the forecast period.
