The global healthcare sector is expected to exhibit robust growth over the coming years due to the rapid progress in medical device technology and the growing demand for effective diagnostic technology that can deliver rapid results. The healthcare sector has become a major investment channel for private investors in recent years, as the growing commercial potential of the healthcare sector has invited significant investment. Government bodies have also prioritized the healthcare sector for major allocation of the overall budget in order to increase the affordability and availability of healthcare services for their population. This has been a major driver for the healthcare sector in recent years and is likely to remain a key agent for growth in the market as the global population grows, resulting in an increasing incidence of various healthcare concerns. The growing global population is likely to further drive government intervention in the healthcare sector in the coming years, leading to steady growth of the sector in developed as well as developing economies.

The growing scope of government-supported health insurance schemes and the resulting political ramifications are likely to be a key factor in the global healthcare sector's growth in the coming years. In the U.S., the Affordable Care Act has been controversial due to the opposition from various political parties. In July 2019, the Affordable Care Act was again brought into the court, for review by a higher court after a lower court in Texas deemed the law unconstitutional. The fallout from this case could prove crucial for the application of the law across the entire country, as there is already significant opposition to the law in certain parts of the country and the case could act as a trendsetter. Even in Europe, NHS funding has been a key plot point in the Brexit drama, with anti-EU movers emphasizing on the potential additions to NHS funding if the UK left the EU.
